

Emergency Dental Care

Research evidence reports that over 50% of the adult population choose to visit the dentist in response to a dental problem in preference to seeking regular dental care.

Some people in North Staffordshire experience difficulty in arranging an urgent dental appointment and as a consequence suffer unnecessarily.

Diana Dental reserves **two hours of appointment time every day** so that anybody with a dental problem can be seen with minimum delay.

It is in your interest to avoid such problems by benefiting from regular dental care, but if you do develop a dental problem which requires urgent attention Diana Road Dental Care will do its best to help you the same day.
